Objective

I am an 18-year-old Grade 13 Science Stream student with a focus on ICT. I am passionate about frontend development, and I have learned web development through my Java institute. I have experience working on multiple development projects and am eager to apply my skills in building interactive and user-friendly websites.

Skills

Frontend Development: HTML, CSS, JavaScript

Problem Solving: Ability to troubleshoot issues and find effective solutions.

App Development: Experience in developing small apps as part of my school projects.

Education

Dudley Senanayaka Central College (Grade 13, Science Stream, ICT subject)

Java Institute (Frontend Development and Web Technologies)

Projects

Developed multiple web development projects during school, including interactive websites and small applications to enhance my learning in frontend development.

Certifications

None at this time.
